Paul Kudarauskas  
Volpe National Transportation Systems Center  
55 Broadway, DTS-32  
Cambridge, MA 02142

Dear Mr. Kudarauskas:

It is Pacific Environmental Services, Inc.'s (PES') understanding that emergency removal actions at the Export Facility have ceased until Millwork West is moved off-site as per the Work Plans. PES has been informed by Mr. Jim Stout of URS Radian that it will be approximately 2 weeks or more before the Burnetts can be moved completely off-site.

As a result, PES may temporarily cut its on-site staff from 3 people to 2 people in order to reduce project costs. As a result, PES will need URS Radian to provide us 7 days notice prior to the start up of removal actions at the Export Facility to ensure that PES can have staff on-site. If PES does not receive 7 days notice, PES may not be able to mobilize staff for field oversight at the Export Facility. This could result in URS Radian not being able to restart removal actions as planned.

Please coordinate this request with URS Radian so project delays are not encountered. Thank you for your assistance with this matter.

Sincerely,

Brian D. Platz, CIH, CSP  
Senior Industrial Hygienist
